

## Tucson Mayor Romero's Backdoor Marxist Trick to Bring the Green New Deal to AZ

The new 0.75% tax in Prop 412 is going to fund the infrastructure the left needs for a hostile takeover of freedom and affordable energy.

**If successful, it won't stop in Tucson!**

Mayor Romero required Tucson's electricity provider TEP add a tax to proposition 412 this month on the ballot, which will not only fund her Climate Action "Green New Deal" plan, but it's also going to destroy Tucson's small businesses and create restrictions on the freedom of movement.

Make no mistake! This is a Marxist takeover of our state, and the voters have no idea what they are *really* voting for!

That's why our sister 501-C3 non-profit created the website [412Facts.com](http://412Facts.com) -- a voter education tool so Tucsonans can know what they are voting for!
